

Striking a Balance:

Effective Pain Management for Cancer Patients

*Join us for an evening with
Christine Miaskowski, RN, PhD, FAAN, to discuss her
research into the causes of pain from cancer treatment,
including peripheral neuropathy.*

For more information on her background, see back of flyer.

Striking a Balance – Effective Pain Management

Patients with and survivors of cancer often have multiple types of pain. This talk will focus on how to tell clinicians about your pain experiences and on how best to manage different types of pain. Information will be provided on both the use of medicines and complimentary approaches to decrease pain and improve function.

Date: Thursday, April 4, 2019

Time: 6:30-8:00pm

Location: Cancer CAREpoint Resource Center

2505 Samaritan Drive, Suite 402, San Jose, CA 95124

Space is limited and advance registration is required. Please register by calling Cancer CAREpoint at: 408.402.6611 or email info@cancercarepoint.org.

Christine Miaskowski, RN, PhD, FAAN, is an internationally recognized expert in pain and symptom management research. Professor, Department of Physiological Nursing, University of California, San Francisco San Francisco, CA. Awarded 2006 Distinguished Researcher Award, Western Institute of Nursing Research.
